HIGH PERFORMANCE COPIERS DESIGNED TO MATCH YOUR NEEDS

Your nearest dealer is

3001

Compact, easy-to-use and very affordable. Intuitive control panel requires little training, so even occasional users have no trouble making error-free copies.

3001 KEY FEATURES

- Up to 10 copies from a single original at the rate of 3 D's per minute
- Cut sheet media: bond, polyester film and vellum/tracing paper
- Long Copy to enable easy reproduction of very long documents
- Automated document handler for multiple copies
- Partial copy to reproduce only the image area you need
- Excellent image quality control
- +/- .5% scale accuracy
- Recall feature automatically restores previous job setting
- Small footprint and quiet operation for use in any professional environment
- Electronic Auditron option—track and control usage. Each account can have a preset limit to ensure that budgets are not exceeded

3030

Higher production capability—up to 240 D size prints per hour. Ideal for larger workgroups, small AEC firms, and others who produce collated sets.

3030 KEY FEATURES

- Up to 15 prints from a single original at the rate of 4 D's per minute
- Online media roll: 500' bond
- Dual language interactive message display gives operating status and maintenance instructions
- Programmed job selection to quickly set up and enable frequently used job applications
- On-board Electronic Auditron with capacity for 250 accounts
- Fully automatic multiple copying
- 'Sets' mode to reproduce collated drawing sets
- Partial copy to reproduce only the image area you need
- Excellent image quality control

THE 3000 SERIES WIDE-FORMAT COPIERS

The XES 3000 Series of wide-format copiers is the industry benchmark for quality, efficiency, reliable performance and point-of-need productivity. With a low initial cost, reasonable operating cost, ease of use and economical space requirements—a 3000 Series copier is easy to cost-justify, even for companies who spend modest amounts on outside services.

HIGH-QUALITY COPIES EVERY TIME

The copy quality of the 3000 Series copiers surpasses any other low-volume, wide-format copiers on the market. With XES' user-friendly control panel and easy-to-use image quality commands, you can quickly reproduce even poor quality originals with excellent results—without the trial and error associated with making copies on other manufacturer's copiers.

HANDLES A WIDE RANGE OF DOCUMENTS

The 3000 Series copiers are extremely flexible. You can copy nearly any document—sepias, blueprints, bond, tracing paper/vellum, and photographs—onto a wide range of media, including bond, vellum/tracing paper or polyester film. Originals can range from 8.5"x11" to 36" by any manageable length, while copies can range from 11"x17" to 36" by any manageable length. Document thickness can range from onionskin thin media to rigid originals 1/8" thick.

POINT-OF-NEED PRODUCTIVITY

With a walk-up 3000 Series copier, you will save time, money and wasted steps by making copies right in your work area. Monochrome copies of black and white or color originals typically run at speeds that are up to 8 times faster and at a much lower cost per copy than making additional prints on inkjets.

FITS INTO ANY WORK ENVIRONMENT

Energy efficient, quiet operation, low heat and ozone emission, and a modest operating area allow the 3000 Series copiers to be installed in even the tightest work environments without disrupting the office while copies are being made.

The 3000 Series offers a copier that is right for you, whatever your copying volume or size of your business.

3040

Incorporating more features than any other 2-roll wide-format copier in its class, the 3040 is the industry benchmark.

3040 KEY FEATURES

- Up to 15 prints from a single original at the rate of 6 D's per minute
- Two online media feed rolls plus manual sheet feed bypass
- Auto media switch changes to the next available media roll when roll in use becomes depleted
- Fully automatic multiple copying
- Dual language interactive message display gives operating status and maintenance instructions
- On-board Electronic Auditron with capacity for 250 accounts
- 'Sets' mode to reproduce collated drawing sets
- Partial copy to reproduce only the image area you need

Supplies

TRIPLE-TESTED SUPPLIES

XES supplies are designed and triple-tested to work with our wide-format copiers, printers and digital systems. We offer specially formulated toner to work with the unique qualities of XES copiers. Continued use of genuine XES toner means that you receive exceptional print quality every time you make a reprographic copy. Our expanded range of media supplies for the engineering

marketplace ranges from paper to film and tracing paper to acetate—all at surprisingly competitive prices. All of our supplies are backed by our Total Satisfaction Guarantee.

Service

FULL SERVICESUPPORT

XES authorized dealers and the XES worldwide service organization understand the need to keep your business up and running. Whether you

need on-site or remote service, standard maintenance support or full-fledged network consulting services, we can respond with XES quality service.
